

Energy Storage Interfaces to Grids and Microgrids

Dr. Adel Nasiri

University of Wisconsin-Milwaukee

Email: nasiri@uwm.edu; URL: www.uwm.edu/~nasiri

Index:

1. Central Power Systems
2. Role of Storage in Microgrids
3. Power System Stability
4. Microgrid Stability
5. Energy Storage for Microgrids
6. Battery Modeling
7. Various Battery Models
8. Electrical Model
9. Thevenin-Based Electrical Model
10. Impedance-Based Electrical Model
11. Runtime-Based Electrical Model
12. Comparison of Various Models
13. Comprehensive Electrical Battery Model
14. Dynamic Electrical Characteristics of the Battery: Usable Capacity
15. Dynamic Electrical Characteristic of the
16. Battery: Usable Capacity
17. Dynamic Electrical Characteristic of the
18. Battery: Usable Capacity and VOC
19. Dynamic Electrical Characteristic of the Battery: Transient Response
20. Model Extraction
21. Open Circuit Voltage vs. SOC
22. Rseries vs. SOC
23. Short-Term Transient vs. SOC
24. Long-Term Transient vs. SOC
25. Li-Ion Capacitors
26. DC and AC Tests Performed
27. Ucap Suggested Electrical Models
28. Results: Internal Capacitance
29. Rint and Series Branch Parameters
30. Capacitance vs. OCV
31. Internal Resistance vs. Temp
32. OCV vs SOC
33. Ultracapcitor Model Verification
34. Efficiency Calculations
35. Zinc-Bromide Energy Storage
36. Properties of Zinc-Bromide Energy Storage
37. Zinc Energy Storage System (ZESS)
38. Testing
39. ZESS Modeling

40. ZESS Modeling (cont'd)
41. Energy Storage Practical Issues
42. Voltage Mode vs. Current Mode of Operation
43. Controls for Storage Inverter
44. Controls for Diesel Generator
45. Fort Sill Microgrid
46. FSMG System Simulation – On grid
47. FSMG System Simulation: Transition
48. (Unintentional Islanding)
49. FSMG System Modeling – Off grid
50. FSMG System Simulation – Off Grid (cont'd)
51. FSMG System– Off Grid
52. (Virtual Frequency Droop Control)
53. FSMG System Simulation – Off grid
54. (Virtual Voltage Droop Control)
55. FSMG System– Off grid Load Demand
56. FSMG System– Off grid Active Po
57. FSMG System– Off grid Reactive Power
58. FSMG System– Off grid Frequency
59. FSMG System– Off grid Voltages
60. Needs for a Technique to Place the Storage
61. System
62. Power Flow Analysis – Newton
63. Raphson fully coupled
64. Introducing Indexes to Quantify the Effect
65. Location of the Storage in a Distribution System
66. Voltage Impact with Storage at
67. Various Locations
68. Performance at Four Locations
69. Battery discharging at 300kW in
70. a low voltage scenario
71. Battery Discharging at 300kW in a Low Voltage Scenario
72. Battery Charging at 400kW in a High Voltage Scenario
73. Lab Tests
74. Test Results
